## YEAST WRANGLER

Wranglers aren't just your dad's brand of blue jeans. As brewers, we spend lots of time cultivating and herding yeast from tank to tank and batch to batch. Us hombres at Holy City fancy ourselves yeast wranglers...

... and it took some serious yeast wrangling to ferment this 10% ABV behemoth to completion. The aggressive nose is courtesy of a dry hop with Centennial, Cascade, and Mosaic. Those three varieties are joined by Warrior and Citra in the boil for an all-out alpha acid assault. Put on your big boy pants/blue jeans for this one.
